

## SPREAD YOUR WINGS,FLY HIGHER

Woza Matrics 2021! I hope you are rearing to go. I find it appropriate to alert you know that Woza Matrics 2021 is back. Many students benefited a lot from it last year. You can visit [www.wozamatrics.co.za](http://www.wozamatrics.co.za) site and benefit resources and other websites that can be visited datafree. Get the timetables and watch Mathematics tutorials on mindset as well as Tswelopele platforms. The Mind the gap study guide is available here too.

Parents and teachers are advised to encourage students to have timetables and allow them to watch these virtual lessons. Allow students to watch TV or on their tablets and monitor the progress too. Variety is the spice of life and what students didn't get from their teachers in class might be covered differently here. Grade 10s and 11s have to start now too. It is to the the advantage of Grades 10&11 to maximise learning time by watching these tutorials especially on the days they are not going to school due to Covid 19-induced timetables. Good luck.
