

To: Teachers and parents

Topic: Term 2 revision work

Message Objective(s): To enable learners to consolidate their skills on term 2 work before commencing on term 3 topics.

Message:

Teachers should continue to provide learners with practice work through worksheets send to parents, in identified topics since schools reopening has been extended by another week. This will enable them to consolidate key skills and concepts for term 2. Work provided this week should be covering concepts identified by teachers during item analysis so that parents can assist their children to close the learning gaps on the topics.

Revision activities can be taken from planners and tracker of respective grades on the NECT website provided below.

Parents are encouraged to take a much active role to support their children since they are spending more time with them during the holiday break. Regular communication between teachers and parents is being encouraged because of the continuous loss of teaching and learning time due to the ongoing covid 19 pandemic.
