

To: FET Mathematics SAs, Parents, Teachers & learners

Topic: Congratulations

Message Objective(s):

1. To improve pass rates at FET Mathematics
2. To enable and encourage teachers and learners to keep on track about studies

Congratulations to our 2021 Grade 12 candidates, parents, and teachers! You represented us in Mathematics examinations this year. Your efforts did not go in vain. Come January 2022 the results will be enjoyed. Well done.

To our Grades 10 and 11 students, the baton stick has been handed to us. I do acknowledge your efforts as well but its time now to start planning for the impending task next year. The time to start preparations is now. Do thorough revisions of work you covered this year and make sure you ask teachers and tutors all topics and concepts not well understood. This will make your firm foundation and an easy passage into the next grade.

There's a saying which says, "It's not over until it is over". Thus, your battle is still on until you obtain your NSC qualification. I urge you to take time to watch Mathematics lessons on DBE TV on OpenView channel 122, SABC1 and SABC Education. Join other activities like summer school that will keep yourselves busy academic wise. For Teachers I also urge you to register with 2Enable virtual platform at www.2Enable.org, a Tswelopele YouTube channel and assist your learners virtually.

I wish you well in your studies.

From: Itai Makuyana
