

To: FET Mathematics SAs, Parents, Teachers & learners

Topic: Time to reflect and plan

Message Objective(s):

1. To improve pass rates at FET Mathematics
2. To enable and encourage teachers and learners reflect and plan

A job well done to every 2021 FET Mathematics team member! Your efforts were not in vain and will soon be reflected in the results. It is time to take a rest, reflect and plan for year ahead. Reflection is important hence 3 mirrors on a car. For teachers, let us look at the resources, methodology and plan to do the best for our learners next year. Let us keep in touch with them to keep the learning mood positive and active. As for Grade 10 and 11 learners, I request you attend the summer school. Have time to reflect on your weak areas as well and prepare to work on them and excel next year. Take care of yourselves and keep well amid Covid 19. Enjoy your Christmas and a happy new year!
