Senior Phase

Properties of whole Numbers

This topic is of great importance in the senior phase hence needs more support from parents and guardians. Learners need the basic skills to **describe** the real number system by **recognising, defining** and **distinguishing properties** of natural numbers, whole numbers, integers, rational numbers, irrational numbers

The above skills will assist them to perform **calculations** with whole numbers using all four operations on whole numbers, estimating and using calculators where appropriate. Where possible provide learners with worksheets for practice. Deep understanding of the above topic will help build a **strong foundation** of all other following topics, concepts and skills.
