

Dear Parent/Caregiver

Finally, schools will be open on Monday for our wonderful learners. The vibe and excitement is electric. Expectations are very high from across the board.

It is important that we fulfil some of the expectations by way of pre-empting some of the Natural Science content our learners will meet.

**Term 1**

**Strand – Life and living**

**Grade 4**

- Living and non living things

**Grade 5**

- Life cycle of plants – development of plants from seed to adult plant

**Grade 6**

- Photosynthesis – Process through which plants make food

Engage learners in effective discussions on the above topics to check prior knowledge and understanding.

Remember to work hard, have fun and make history – Jeff Bezos

Thank you
