

MAKING CHOICES

The choices we make today has a great bearing on what our future holds. Parents and guardians should provide the best for their children. To our Grade 12s, choose to study hard, attending all lessons during and after school. Friends who like studying and are focussed are better choices. Find quiet and undisturbed areas in which to study. There are only 3 topics only this term. The best choice is to find all resources that talks about them, be it books, teachers or television and explore every related past exam paper. Make the choice of asking teachers not always an option. The time for making correct choices is now!
