

Dear Parent/Caregiver

The integration of home and school learning will improve learners mastery of concepts as they are able to link school work with home based activities.

In NSTech, Term 1 focuses on the Strand: **Life and Living**. One of the topics covered is Habitats. A habitat is a place where plants and animals live.

For this week allow learners to

- **Identify, draw and describe** the different habitats around them.
- Explain** why such habitats are good for plants and animals living in them.
- Creatively **design and describe** any habitat outside their surroundings.

ALWAYS remember that learners feel in control and empowered when given an opportunity to express their acquired knowledge and skills.

Regards
