

## A TIME FOR REFLECTION

First term is over! Well done to students, teachers and parents for taking part in this Mathematics journey so far. I hope the results of our sweat are already out as we get into the short holiday. Let us use results to reflect on our performance. Where did we perform best and where was our performance lacking? What were our challenges and how can we improve next term? We need to take this opportunity to plan for the term ahead too. Draw targets and decide on actions to reach them. Sometimes it is better to put thoughts into writing, so write!
