Inter-Sen Phase

Revision and consolidation work for term 1

Learners are going for a short holiday. There is need therefore for teachers to prepare worksheets covering core concepts and skills for revision purposes. Parents can design a study programme for their children during the time. The following concepts need to be addressed to close the identified learning gaps during the term.

1. Intermediate Phase: place value, addition, subtraction, multiplication, division,
2. Senior Phase: Exponents, common and decimal fractions/percentages, integers

Parents should encourage children to practice work on the above concepts and skills for consolidation.
