

To: Teachers and subject advisors

Topic: Term 3 planning-and diagnostic assessment development.

Message Objective(s): To enable teachers plan for content work and the diagnostic assessment for covered in term 3 to remediate common misconceptions of previous terms.

Message:

To ensure that meaningful teaching continues during the quarter 3 teaching time as per the school calendar. Teachers need to plan how the daily lesson plans are going to unfold. They should read through the RPAT for term 3 to gain in-depth understanding of the routines and content to be used in the term. The RATP assists with guided pacing and sequencing of curriculum content and assessment to be administered. Of importance is the assistance to teachers with planning for the different forms of assessment. Assessment Item bank has been provided in the RPAT for reference and guidance as teachers develop the diagnostic assessment for term 3 which is spiral in nature and provides learners with the opportunity to demonstrate their growth and understanding on a regular basis. The assessment also helps teacher see where learners are struggling and offer relevant remediation.
