

To: FET Mathematics SAs, Parents, Teachers & learners

Topic: Recovery

Message Objective(s):

1. To improve pass rates at FET Mathematics
2. To enable teachers, parents, and learners to recover learning losses during Covid 19 period.

The past two weeks have been hectic with examinations. I hope you managed to sail through since we had assisted each other to prepare for them. Get prepared to receive the results as school closes this week. Let us accept the results as they come. The important thing is to learn from them.

For our teachers, the results give us an indicator of what was understood by the learners and what is yet to be revised. We need to take time, even outside learning hours to give extra lessons for both the learners and our best achievements at the end of the year.

To the learners, trial examination results are a measure of how much we understood during the year and what is to be revised going forward. We need to recover what we missed during our learning time. There is need for us to put more effort in our weaker areas. Get more questions in those topics and practice them. Use as many learning platforms as possible.

All the best in your Exams!
