

To: FET Mathematics SAs, Parents, Teachers & learners

Topic: Reboot

Message Objective(s):

1. To improve pass rates at FET Mathematics
2. To enable teachers, parents, and learners to change ways of teaching and learning

Time seems to move fast. Term 1 has just ended and yet there is much to be done. Some of our schools are still using rotational time tabling leaving us with a big task of covering the curriculum and succeeding in our studies. This situation requires us to reboot in every aspect of our teaching and learning.

Every teacher, learner and parent is required to be resilient during this time of Covid 19 pandemic. But how can we learn from our challenges and move on? The following are some of the ideas that I am suggesting.

Teaching and learning involve planning, lesson delivery, assessments, and reflection. The teachers should refocus and take a shift in each of the processes taking into omniscience new way of teaching and learning like promoting the use digital learning platforms. The teachers and learners should communicate more using the WhatsApp as well as forming such groups. Encouragement is also given to let learners learn through TV programmes.

The teaching should also put the emotional side of the learner into consideration since this pandemic brought about different emotions and stress. Create a favourable learning atmosphere that allows accommodation of every learner to learn with less stress. Be available for our learners.

Parents should ensure that they provide necessary resources and space for learners to adapt and learn using the modern methods.

Let us all adopt and adapt and shift to the new normal ways of teaching and learning. Together we will make it this year!
