Introduction

Dear Senior Phase Teachers,

The COVID-19 Pandemic has left us with an enormous challenge in education. As we return to ‘normal schooling’, we all have to work smarter and harder to ensure that our system recovers.

For Senior Phase EFAL teachers, it becomes more important than ever for you to focus on developing learners’ mastery of reading, comprehension and writing skills, and on the acquisition of English cognitive academic language. South Africa needs you to do your very best to equip your learners with these skills.

This document is designed to help you achieve this. By systematically working through this plan, we are confident that you can address the loss of teaching and learning time, and bring your learners to the level where they need to be.

We thank you in advance for the commitment, dedication and hard work that is required of you.

You are truly building our nation.

With very best wishes for the term ahead,

The NECT EFAL Team

Recovery ATP Requirements

- In the Recovery ATP, key skills and content are frequently repeated, which is essential for the development of language competency.
- This summary is a cohesive list of all skills and content included in the Recovery ATP.

Recovery Teaching and Learning

Now more than ever it is important to maximise the impact of EFAL teaching and learning.

This can be done in the following ways:

- 1 Create and follow a cycle routine.** Do the same kinds of lessons, in the same order over a two-week period. As learners become familiar with the routine and lesson types, they can focus on the content of the lesson, rather than trying to work out what is expected of them.
- 2 Explicitly teach vocabulary.** Learners need to acquire cognitive academic language proficiency (CALP). This is the kind of language that will help them to express themselves at an academic level. Select the vocabulary to teach from the theme reading texts and related concepts. Give learners multiple opportunities to use the new vocabulary in all the different skills: listening, speaking, reading, and writing.
- 3 Support learning through scaffolding.** Model all activities – show learners what is expected of them, rather than telling them. Provide frameworks for written work. These frameworks should model the correct format and structure of a genre. Make the use of scaffolding optional – learners who do not need the support should not have to use it.
- 4 Support learning through repetition.** Always remember that EFAL is an additional language. Carefully structured repetition can be a powerful language learning tool. Read texts a number of times, focussing on different aspects with each read. Use the same texts for a number of different activities, to allow learners to deepen their understanding of the text and related concepts and to consolidate vocabulary.

Creating a Routine for Language Learning

- One of the best ways to ensure that time allocation is CAPS compliant, and that all ATP skills and content are covered, is to develop and use a **routine for language learning**.
- In each **2-week cycle**, all the components of language learning must be covered as follows:

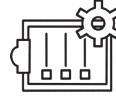

CAPS TIME ALLOCATION	GRADES 7–9
Listening & Speaking	2 hours
Reading & Viewing	3 h 30 min
Writing & Presenting	3 h 30 min
Language Structures & Conventions	1 hour
TOTAL	10 HOURS

- What follows is an example CAPS-aligned cycle routine, that you may choose to use
- Following this example routine and the example lesson activities will ensure that:
 - a The CAPS time allocations for each component are correct
 - b The CAPS skills and content requirements are met
 - c There is a logical progression from receptive language to expressive language in every theme
 - d Learners are supported through repetition and scaffolding
 - e The learning programme is text-based and communicative, as per CAPS
- When planning the content for each cycle, please consider:
 - a A theme for each cycle. The ‘Planner & Tracker’ framework from page 9–23 includes suggested themes, texts and activities for all the approved LTSM.
 - b The ‘Summary of the Recovery ATP’ on pages 2–5. For each lesson, please consider the specific skills and content that will be covered.

Official Tracking of Curriculum Coverage

In order to standardise the tracking of curriculum coverage, the DBE is implementing an *Annual Teaching Plan Guide* for Home Language and EFAL to ensure that all teachers cover a minimum number of informal or formative activities every year.

Please note that the requirements are the same for both Home Language and EFAL.

- The purpose of this guide is to ensure that proper attention is given to informal and formative activities, as well as to the specified formal assessment tasks.

The first form that follows is the official **DBE Annual Teaching Plan Guide** for EFAL.

- This gives you a clear idea of the minimum number of informal or formative activities that must be completed over the course of the year.

The second form is a simple **ATP Tracker** for EFAL.

- This form provides space for you to keep a record of the required activities for the term.
- It also has space to record the date for each activity, as an easy reference for verification.

The DBE will soon require this data to be captured on the SA SAMS system.

- This form includes all the details required for this process.
- It is good practice to start recording the required data from this point onwards.

Term 1 FAT 3 Response to Texts

PART A: READING COMPREHENSION

NAME: _____

INSTRUCTIONS:

- Read the text below twice.
- Answer the questions that follow.

Living longer	
1	Kane Tanaka is the world's oldest living person. She was born on the 2 January 1903 in the village of Wajiro, in Japan. She was the third daughter and seventh child of her parents, Kumayoshi and Kuma Ota. Kane married Hideo Tanaka in 1922 and they had two sons and two daughters. The couple also adopted a third daughter (the second daughter of Hideo's sister). Sadly, Kane's eldest daughter died shortly after birth and her second daughter died at the age of one in 1947, while her adoptive daughter died in 1945 at the age of 23 from an unknown illness. The couple worked in a food shop selling sweet bean soup and noodles.
2	After World War II, Kane converted to Christianity because of the influence of pastors who were there because of the United States military. Kane retired at the age of 63 and travelled to the United States to visit her relatives. Her husband died in 1993 at the age of 90, after 71 years of marriage. Since 2018, Kane has been living in a nursing home in Higashi-ku, Fukuoka. In March 2019, Tanaka was officially presented with the 'World's Oldest Living Person' and 'World's Oldest Living Woman' titles by the Guinness World Records. According to reports, she was still in good health on her 118th birthday. She likes to take short walks in the corridors in the nursing home and her hobbies include calligraphy and solving mathematics problems.
3	Kane has had several major illnesses including cancer and had to have surgery at the age of 103. In an interview at the age of 114, Kane said she would like to live to the age of 120. She claims her faith in God, her family, sleep, hope, eating good food, and practicing mathematics have helped her live a long life. Kane was supposed to hold the Olympic torch at the 2020 Summer Olympics, but she withdrew because she was worried about rising COVID-19 cases in Japan.
4	Life expectancy has increased dramatically around the globe. In 1841, a baby girl was expected to live to just 42 years of age, a boy to 40. Nowadays, on average, a baby girl can expect to reach 75 a boy, 70. This is due to several reasons many of them are to do with children's chances of surviving their first 5 years. Even though for many people today life is hard, these days there is better nutrition, vaccinations, safer and cleaner living conditions, and advancements in medical treatments.
5	So, the question is, what do we do with these extra years? Does a long life mean a happy life? How can we ensure we add quality to our years? What are the potential problems with people living longer? Societies have to re-think many aspects of life so that future retirees can relax and enjoy their golden years.

QUESTIONS:

- 1 How old is the world's oldest living person? (1)**

- 5 Kane lists several reasons that she lived for so long. Name two. (2)**
... and ...
- 6 Can you infer how Kane felt when she had to go to hospital and have surgery at the age of 103? (2)**
I infer she felt...
- 7 Why did Kane not hold the Olympic torch in 2020? (1)**
She did not hold the Olympic torch because...
- 8 Would you like to live to be 100 or older? Why or why not? (2)**
I would/would not, because ...
- 9 What would be an advantage to living so long and what would be a disadvantage? (2)**
*An advantage to living so long would be...
A disadvantage to living so long would be...*
- 10 Evaluate what life was like in the 1840s for the average person? (2)**
