Lesson 11: Consolidation

CONSOLIDATION ACTIVITIES

- 1 Look at the example and then do the calculations.

Example: Tia has saved R2 100 and Nina has saved R 1 400.

- a** How much have they saved altogether?

Number sentence: $2\ 100 + 1\ 400 = \square$

21 hundred + 14 hundreds = \square

$21 + 14 = 35$

So, $2\ 100 + 1\ 400 = 3\ 500$

They have saved R3 500 altogether.

- b** How much more has Tia saved?

Number sentence: $2\ 100 - 1\ 400 = \square$

21 hundreds - 14 hundreds = \square

$21 - 14 = 7$

So, $2\ 100 - 1\ 400 = 700$

Tia has saved R700 more than Nina.

Now try these:

a $120\ 000 + 230\ 000 =$ _____

b $2\ 352\ 000 - 12\ 000 =$ _____

c $18\ \text{TTh} + 11\ \text{TTh} =$ _____

d $129\ \text{HTh} - 18\ \text{HTh} =$ _____

Lesson 11: Consolidation

2 Look at the example and then do the calculations.

Example: If one dog eats 350 g of food a day, how much food will the dog eat for 10 days?

Number sentence:

$$10 \times 350 = \square$$

$$10 \times 350 = 3\,500$$

The dog will eat 3 500 g of food over 10 days.

Now try these:

a $79 \times 10 =$ _____

b $37 \times 100 =$ _____

c $53 \times 1\,000 =$ _____

d $12\,500 \times 10 =$ _____

3 Look at the example and then do the calculations.

Example: If 10 workers laid 480 bricks, how many bricks did one worker lay?

Number sentence:

$$480 \div 10 = \square$$

Think of 480 as 48×10

$$480 \div 10 = 48$$

One worker laid 48 bricks.

Now try these:

a $560 \div 10 =$ _____

b $12\,300 \div 100 =$ _____

c $87\,000 \div 10 =$ _____

d $325\,000 \div 1\,000 =$ _____

The image displays a 4x3 grid of 12 hundred grids. Each grid is a 10x10 square divided into four quadrants by a vertical line and a horizontal line. The top-left and bottom-right quadrants are each further divided into four smaller 5x5 squares by a diagonal line. This layout is commonly used for teaching place value, multiplication, and division.
